

IN THE CLAIMS

Please amend the claims as follows:

Claims 1-2 (Cancelled).

Claim 3 (Currently Amended): The blow-molding method as claimed in claim 1 ~~5~~, wherein the mold temperature falls between (the crystallization point of the resin - 10°C) and (the crystallization point thereof + 10°C), ~~ad~~ and the dwell time falls between 40 and 250 seconds.

Claim 4 (Currently Amended): The blow-molding method as claimed in claim 1 ~~5~~, wherein the mold cooling rate falls between 50 and 500°C/min.

Claim 5 (New): A method for producing blow moldings of crystalline thermoplastic resin, which comprises setting a melt parison of a crystalline thermoplastic resin in a mold and then blowing the parison, the method comprising the steps of

- (1) blowing and shaping the parison at a mold temperature falling between the crystallization point of the resin minus 10°C and the melting point of the resin;
 - (2) cooling the blown parison at a temperature falling between the crystallization point of the resin minus 15°C and the crystallization point thereof minus 45°C,
 - (3) keeping the blown parison for a dwell time falling between 30 and 300 seconds;
- and
- (4) cooling the blown parison in an ordinary manner.

DISCUSSION OF THE AMENDMENT

Claims 1 and 2 have been cancelled and replaced with new Claim 5, which is based on the combination of Claims 1 and 2. Claims 3 and 4 have been amended to depend on Claim 5. In addition, a spelling error has been corrected in Claim 3.

No new matter has been added by the above amendment. Claims 3-5 are now pending in the application.
